

SNAP ON SMILE®

Snap-On-Smile is an affordable, non-invasive, cosmetic, and completely reversible appliance that can give you a new smile in as little as two visits!

Quite often patients will inquire about veneers or smile makeovers. Although they would benefit from these services, they find the financial investment to be prohibitive. The Snap-On-Smile is roughly the cost of one-and-a-half veneers.

People who would benefit from this appliance include almost anyone who:

- wants veneers or a makeover, but want to see what it would look like before they undergo an irreversible procedure.
- would like a Hollywood smile without the expense, discomfort, and length of complex and invasive dental procedures.
- wants veneers or a makeover, but cannot afford the procedures at the moment.
- wants to eliminate gaps, crooked teeth, stains, or missing teeth.
- wants to have a cosmetic procedure, but is terrified of needles and dental treatment.

Here is the story of a patient we recently treated. She presented with two concerns: 1) the coloration of her front tooth and 2) she wanted to show more of her teeth when she smiled:

After two visits, here is how she looks!
